

## **What's New .... Summer 2022**

HPA is working once again with the **New Hampshire Department of Environmental Service's Volunteer Lake Association Program**. Individual Lake Reports are now available showing results from the 2021 Data Summary for Harrisville Pond. Overall the health of our pond continues to be stable. To may read a more detailed summary of this report by going to the *New Hampshire Department of Enviromental Services website and search VLAP Reports*. Our volunteers plan to collect water samples three times this season from Harrisville Pond and deliver them to NH DES JCLC in Concord. The reports that are generated from these water samples are critical in helping us to monitor and maintain the water quality of Harrisville Pond. If you are interested in helping out with this program, please contact Teresa Morris at [t90morri@gmail.com](mailto:t90morri@gmail.com).

A big THANK YOU to the Harrisville Conservation Commission for awarding HPA a grant of \$750.00 to help defray the costs of our Lake Hosts program.

If you own property on the lake, consider participating in "LakeSmart: A Lake-Friendly Living Program, sponsored by New Hampshire Lakes Association. You can find details at - [nhlakes.org/lakesmart/](http://nhlakes.org/lakesmart/)

**Finally, please join us at the beach July 16th for the HPA Annual Meeting. The rain date will be July 30th.**
